Test Conducted:

1. Description of packaged-product

- a) External container size (mm): length 1320 X width 1120 X depth 1280
- b) Gross weight (kg): 40.5

2. Transportation test

a) Incline Impact (As per GB/T 4857.11-2005)	Test requirement:			
	Sequence	Impact Velocity	Orientation	Specific face
	No.1	1.3m/s	Face	One of the smallest vertical faces
	No.2		Face	One of the adjacent largest vertical face
Result: After the test, the sample appearance is normal. There are no cracks, deformation, damage or structural failure affecting the use of each component.				
b) Drop test (As per GB/T 15234-1994)	Test requirement:			
	<ol style="list-style-type: none"> Take the pallet and top cover for drop test. Lift any corner of the pallet and the top cover of the sample to a height 1200mm, and make the same corner fall freely to the flat steel ground for 3 times. The pallet and the top cover were dropped for 6 times. The appearance of the sample shall be free of cracks and deformation affecting the use after dropping. 			
Result: After the test, the appearance of the pallet and the top cover of the sample is free of cracks and deformation affecting the use.				
c) Compression test (As per GB/T 4857.4-2008)	Test requirement:			
	<ol style="list-style-type: none"> Place the samples on the lower platen of the pressure testing machine. Press the pressure plate on the pressure testing machine at a constant speed of 12.7mm/min until the sample is crushed and record the crushing value. 			
Result: 26267 N (Remark: Maximal load of the test machine is 4.8t)

Remark:

1. Since the data and / or information above division line of front page is provided by the applicant, the relevant results or conclusions of this report are only made for these data and / or information, SGS shall not be responsible for the authenticity and integrity of such data and information and the validity of the results and / or conclusions arising therefrom. Testing results only apply to the sample as received.
2. The declaration of conformity is based on acceptance limits chosen based on simple acceptance ($w = 0$, $AL = TL$).

Statements of conformity are reported as:

Passed - The measured values were observed in tolerance at the points tested.

Failed - One or more measured values were observed out of tolerance at the points tested.
